It's all here...melody, composition, and heart. A song-oriented acoustic guitar based album that reaches well beyond the genre. 10 MP3 Songs FOLK: Modern Folk, JAZZ: Smooth Jazz Details: First let me say this record was a helluva lot of fun to make. It was recorded in a very short, and intense, period of time using the most fundamental of recording techniques. We used microphones to record real musicians making actual sounds on musical instruments...and other things. We even invented a thing or two, kind of a "make it up as you go along" approach...very creative atmosphere. Combine that with the calibre of musicians I got lucky enough to work with, and the degree of commitment and participation each of them brought to the sessions and wow!...something wonderful happened. About the songs...Each and every one means something very special to me...I chose to record these in particular for that very reason, and hopefully, that'll be apparent when you listen...Thanks for taking a look, James
