A story of winter, in eight chapters. 8 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Ambient Details:

Thom Brennan started creating his soundscapes and rhythmic journeys in the early 1980's, releasing his debut album "Mountains" in 1987. Inspired by landscapes of the American southwest and Pacific Northwest, his self-produced albums have defined a unique and organic style of sound painting...a colorful and private world of harmonic tapestries. In addition to a series of solo productions, collaborations with soundworld composer Steve Roach appeared on the CD "Western Spaces", and later the Projekt Records compilation "Amplexus". Recordings have been released on Rubicon Records (Canada), Phonogram (France), Amplexus / Arya (Italy), Projekt, Fortuna, Space For Music, AtmoWorks, and his own RainGarden Music.
