This album centers me when I am feeling lost. Soul Coffee 12 MP3 Songs EASY LISTENING: Soft Rock, EASY LISTENING: Love Songs Details: Kitty Hawk has been playing music since her brother put a guitar in her hand as a teenager, she had had already piano training, and singing in her childhood. Kitty's natural ability to arrange music, and her ear for melody and harmony all were tools to build the foundations of these compositions throughout her career as a recording artist, and it has made all of her music interesting, and enjoyable to listen to. She has recorded much music of different styles in her recording career. Her first album was with a band called Free Dyr, legendary in NW Montana from the late nineties. A six piece jam band famous for songs as diverse as "Understand", "Grizzly Bear", "Navar's Poem", and "Park Bench". After the band experience Kitty spent some time in Nashville, Tennessee working on songwriting and lyrical composition. She returned to Washington DC, her hometown, to record the aforementioned album, entitled SOUL COFFEE; her debut album as a solo artist, and a finished work after having recorded various songs individually in Nashville "Where The Angels Play" and "Half Silver Moon Tide" recorded in Montana. This ensemble of songs is a perfect match to what "soul coffee" is, and therefor a work to be recognized.
