

Mp3 Sunny Heartley - Sound Vibrational Healing Vol2 72 Names Of God

[DOWNLOAD HERE](#)

Deep healing meditation with lush musical backgrounds embellished with Native American Flute melodies. Use of the 12 tone chromatic scales gives complete balance of 12 major points for healing intention. 12 MP3 Songs NEW AGE: Healing, NEW AGE: Meditation Details: Sunny Heartley is a Composer, Multi-Instrumentalist, Recording Engineer, and Craftsman of his own line of Native American Style Flutes, which he uses exclusively on his solo recordings with great pride. The Flute Line is extremely successful and growing all the time. Recently a Chakra Flute Set has been added to his line of flutes, which shows you how Sunny has set his intention to use these beautiful instruments as Healing Tools through the Music he creates. This Multi-Faceted Musician has composed and recorded 14 CD projects over the last 10 years of his solo career and has been well received by fans of flute music and New Age music. Although Sunny's music career has spanned 35+ years, it is not until his recent decision to go SOLO, that his career has gone onward and upward. To the stars, if you will! Sunny's Keyboard skills and his ability to control his recording environment, give him ultimate flexibility and the time to create his music, music that spans all genres. His CD's are used by massage therapists, yoga instructors and dance DJ's. So as you can see he bridges all musical styles with grace and ease. This talented musician has recently gained national recognition, in the USA, as he received a Peoples Choice Award at the International New Age Trade Show for Best New Healing CD. This has been a real booster for Sunny's career, giving him even more reason to create more Healing Music, and God knows, we need all the healing we can get. Sunny does have a motto... Healing The Planet...One Note at a Time! The ability to heal through intentionality is what this music is intended was created for and a workshop series based on the 12 tone scale and the uses therein is what is covered in these two to three day workshops. The

guidelines in the liner notes of the CD are a starting point for those of you who wish to have a beginning point of focus when you use the music for a meditation or your own personal healing. The concept of this CD follows the 12 Tone Chromatic Scale, which encompasses 12 points of healing. 7 of these points are the traditional Chakra Points, while the other 5 cover some of the Kabbalah points linking the connection of the male and female aspects of our physical being. The Chakra Points also double as Kabbalah Points as well. On my website there is an original sketch, which will be a full 5'X8' Painting I will be traveling with. Conceptually the CD "The 72 Names of God" comes from inspiration provided by a book by Yehuda Berg known as "The 72 Names of God". What I did was to pick 6 of the appropriate "names" that would work with the intention and key of the song, and then chanted them, and deeply embedded them into the 12 Tracks on the CD. The Power of these Chants really showed themselves when a friend suggested that I leave out the chants and call the CD something else. So one evening while working on the Mix of 72 Names, I decided to mute the Chant Tracks to see what would happen...guess what! The energy of the songs fell flat and no spirit or life in them. Thus the Chants were left as they were and I will never allow anyone to ever influence my Intuitive Creativity ever again. To me this CD is very powerful and is receiving a very positive response everytime I play these pieces live. The CD has 12 Tracks and is just over 72 minutes short!
