So what has this got to do with you? In two words: A LOT. Before we jump into the Internet Marketing context, let me explain. Did you notice that retailers and chain stores are now slowly producing products of their own in the offline world? Perhaps you did. Or maybe you weren't aware. It's okay even if you didn't realize this change, as I'm about to reveal it to you. And when this happens, it won't come as any surprise that many a product brand are now competing for shelf space even with their retailers.
