Raw emotion. Pivotal silence. Exploring the folk-rock continuum with abandon. 6 MP3 Songs ROCK: Acoustic, FOLK: Power-folk Details: Mostly the world is too noisy already. Noisy with sound, distraction, rationalization. To add more noise is a treacherous proposition and an ethical dilemma. How to enhance the essence without adding to the clutter? I search for the silence in every song. The moment that lifts us out of the noise to a higher vibration. These songs are pieces of me. The whole has always been illusive. I don't pretend that my influences are fully integrated; the closer I hold my influences, the more I find of myself. I don't want a style; I want a voice. A voice in song, a place in music, a link in the chain. My earliest memories are of music: my parents' albums on a Fisher Price record player. I can trace my life through the music I've loved: Otis, Elton, Bruce, Patti, Nina, Bob... Who will take me through the next chapter? I crave an end I can't see. If I'm lucky, my last memories will be of music as well.
