Jazzy breakbeats and funky trip hop tunes come together in this definitive funky breaks album. 13 MP3 Songs ELECTRONIC: Breakbeat/Breaks, HIP HOP/RAP: Trip Hop Details: Tal M. Klein and David Marino formed Trancenden as a live DJ/band fusion act in 1996. In 1997 they released their first album, "Zen and The Art of Insanity." By that point Tal and Dave were performing in various New York City lounges and clubs and they released their acclaimed first vinyl pressing, the DJ's Delight EP, which promptly sold out almost immediately following its release. After releasing the second pressing of DJ's Delight, Dave took a hiatus from Trancenden to focus on his career. However, they reemerged together a year later with a deeply profound ambient project which they worked on with Maria Cuccia (Empath) and artist Craig Allen. Following the release of Empath vs. Trancenden, Dave and Tal began to work on an unrealized progressive drum n bass project, but their styles had grown different and they both wanted to pursue solo endeavors. Tal then began to work on his first solo Trancenden project, entitled "nicoTine fits anaLogue beats." All Music Guide defined this release best when they wrote, "The album is constructed from the bottom up, using beats from here and sampled bits from over there, built up to create something fun, dancy, and funky." Almost four years and several releases later, Trancenden's goal remains the same. Tal now lives in Northern California where he continues to find creative ways of redefining the lounge scene (most recently with his "peace love beats" album, and ambitious live venture, "t.vs.T" with friends and fellow musicians Dan and Mel from t spigot).
