

Stroh Formalism And Rayleigh Waves

[DOWNLOAD HERE](#)

Preface- Chapter 1: The Stroh Formalism for Static Elasticity- Section 1.1: Basic Elasticity- Section 1.2: Stroh's Eigenvalue Problem- Section 1.3: Rotational Invariance of Stroh Eigenvector in Reference Plane- Section 1.4: Forms of Basic Solutions When Stroh's Eigenvalue Problem is Degenerate- Section 1.5: Rotational Dependence When Stroh's Eigenvalue Problem is Degenerate- Section 1.6: Angular Average of Stroh's Eigenvalue Problem: Integral Formalism- Section 1.7: Surface Impedance Tensor- Section 1.8: Examples- Subsection 1.8.1: Isotropic Media- Subsection 1.8.2: Transversely Isotropic Media- Section 1.9: Justification of the Solutions in the Stroh Formalism- Section 1.10: Comments and References- Section 1.11: Exercises- Chapter 2: Applications in Static Elasticity- Section 2.1: Fundamental Solutions- Subsection 2.1.1: Fundamental Solution in the Stroh Formalism- Subsection 2.1.2: Formulas for Fundamental Solutions: Examples- Section 2.2: Piezoelectricity- Subsection 2.2.1: Basic Theory- Subsection 2.2.2: Extension of the Stroh Formalism- Subsection 2.2.3: Surface Impedance Tensor of Piezoelectricity- Subsection 2.2.4: Formula for Surface Impedance Tensor of Piezoelectricity: Example- Section 2.3: Inverse Boundary Value Problem- Subsection 2.3.1: Dirichlet to Neumann map- Subsection 2.3.2: Reconstruction of Elasticity Tensor- Subsubsection 2.3.2.1: Reconstruction of Surface Impedance Tensor from Localized Dirichlet to Neumann Map- Subsubsection 2.3.2.2: Reconstruction of Elasticity Tensor from Surface Impedance Tensor- Section 2.4: Comments and References- Section 2.5: Exercises- Chapter 3: Rayleigh waves in the Stroh formalism- Section 3.1: The Stroh Formalism for Dynamic Elasticity- Section 3.2: Basic Theorems and Integral Formalism- Section 3.3: Rayleigh Waves in Elastic Half-space- Section 3.4: Rayleigh Waves in Isotropic Elasticity- Section 3.5: Rayleigh Waves in Weakly Anisotropic Elastic Media- Section 3.6: Rayleigh Waves in Anisotropic Elasticity- Subsection 3.6.1: Limiting Wave Solution- Subsection 3.6.2: Existence Criterion Based on S_3 - Subsection 3.6.3: Existence Criterion Based on Z - Subsection 3.6.4: Existence Criterion Based on Slowness Sections- Section 3.7: Comments and References- Section 3.8: Exercises EAN/ISBN : 9781402063893
