

# System Engineering And Automation

[DOWNLOAD HERE](#)

Introduction to Systems- System Concept - Systems Classification - Static/Dynamic - Stochastic/Deterministic - Continuous/Discrete/Event Discrete - Closed/Open Loop - Systems Description - External Description - Internal Description - System Modeling- System Model - System Dynamic Equations - Electrical Systems - Mechanical Systems - Hydraulic Systems - Thermal Systems - Hybrid Systems - System Description - Continuous Time Systems - Linear and Invariant Time Systems - Systems Linearization - Laplace Transform - Direct Laplace Transform - Inverse Laplace Transform - Transfer Function - The State Space Approach - Relation Between Transfer Function and State Space Approaches - Block Diagrams - System Response Analysis - System Time Response - System Transient Response - Root Locus - Identification - First-order System Identification - Second-order System Identification - System Stability - System Stationary Response - Steady-state error for step reference - Steady-state error for ramp reference - Introduction to Control Systems - Control Systems - Basic Control Actions - PID Controller - Proportional Control - Integral Control - Derivative Control - PID Summary - Design of Controllers. Ziegler-Nichols techniques - Ziegler-Nichols technique in open loop - Ziegler-Nichols technique in close loop - Applications - System Simulation - Simulation Objectives - Numerical Methods - Explicit Numerical Methods - Implicit Numerical Methods - Multistep Numerical Methods - Integration Step Selection - Systems Simulation in SIMULINK - Systems Simulation in SIMSCAPE - Applications - Appendix A: The MATLAB System Control Toolbox - Creation of Models - Transfer Function - Zeros, Poles and Gain - State Space - Access to Model Data - Building Complex Models - Conversion between models - Time Response - Appendix B: The rltool Interactive Tutorial - Appendix C: The SIMULINK Interactive Tutorial - Introduction - Creating a Model - SIMULINK Libraries - Continuous Library - Source Library - Sinks Library - Math Operations Library - Lookup Table Library - Discontinuities Library - Signal Routing Library - Ports and Subsystems Library - User-defined Functions Library - Additional Linear Library - Appendix D: The SIMSCAPE Modeling Environment Tutorial - Introduction - Creating a Model - SIMSCAPE Libraries - Electrical Library - Hydraulic Library - Mechanical Library - Thermal Library - Physical Signal Library - Utilities Library EAN/ISBN : 9783642202308

Publisher(s): Springer, Berlin Discussed keywords: Automatisierungstechnik, Systemtechnik Format:

ePub/PDF Author(s): Fernandez de Canete, Javier - Galindo, Cipriano - Garcia-Moral, Inmaculada
