

To Live Is To Die The Life And Death Of Metallica's Cliff Burton - Joel McIver

Metallica the seventh-biggest recording act in American history are consummate musicians – but it wasn't always that way. A significant proportion of their playing expertise was acquired from a pivotal three-year period in their history – 1983 to 1986 – during which their music a potent variant of thrash metal evolved from garage-level to sophisticated progressive heights – thanks to the teachings of their bass player Cliff Burton. The San Francisco-raised Burton pushed the band to new musical levels with his musical training songwriting ability and phenomenal bass guitar skills. Cliff's life was short but influential; his death was sudden and shocking. With his death Metallica's most critically acclaimed period of activity ended. They went on to record huge-selling albums but by their own admission never pushed the creative envelope as radically as they had done in the first four years of their career.
