This book is about the learning process of architects whatever the field they work in. It provides the path for the evolution of architectural skills in the field of the architect's vocation. It includes fifteen stations that need to be passed in order to manage a structural functionalist approach. The unicist approach to architecture includes the need to know the ontological structure of what is being built in order to ensure its utility, aesthetics and solidity. It covers, among other subjects: the ontology of doers, segments of doers, maximal and minimum strategy of doers, the role of the architect, the art of architects, the unicist ontology of art, the unicist ontology of the art of architects, segments of architects, see to believe or believe to see, perception and credibility, the unicist ontology of inner freedom, expanding your personal boundaries, confirming the necessary knowledge, focusing on solutions, hyperreality building, discovering the aesthetics, designing the aesthetics, timing and time management, adaptive system design, pilot test design, communication building and the unicist ontology of leadership.
