

Mp3 Andrew Rosas - 23rd And 2

[DOWNLOAD HERE](#)

Warm classic power pop with a contemporary feel and sweet folk rock highlights. Melodies that grab you and harmonies that hold you. 12 MP3 Songs POP: Power Pop, ROCK: Folk Rock Details: 23rd and 2 is the debut album from local Austin singer/songwriter/multi-instrumentalist Andrew Rosas. Content with a Telecaster or beat up acoustic, Rosas crafts luminous pop with a slightly rough edge. The opening number Looking Out dives right in with the bright guitars and crisp harmonies that grab the ear. The lush title track 23rd and 2 follows as a powerful example of what great pop can be. The sound of the acoustic tracks harkens back to the dawning of power-pop balladry, Say Its You and the achingly simple Your Concern ring with tinges of Chris Bell influence and others like the haunting yet hopeful Southern Hymn recall the simple elegance of George Harrison. The album is not without its rock n roll fervor though; Everything That You Say turns up the amps, kicks in the quintessential power-pop harmonies, and cues the Bonham heavy drum licks. The songwriting brings the record together with an encompassing sense of youthful innocence balanced with tenderness and maturity. Various other musical talents also appear on the album. Rosas recruited his good friends (three of whom are in a local Santa Fe band Babelshack) Dylan McDowell on the drums, Westin McDowell on lead guitar, David Hixon on bass, and additional vocals by A.G. Kirby. Rosas went to Santa Fe in January 2006 and recorded four initial tracks. Those were 23rd and 2, All Night, Keep On Moving, and Nowhere Fast. The success of those songs brought Rosas back that summer to record the rest of the album. Most of the songs were written prior to the recording sessions except for Your Concern, Grasp The Nettle, and Western Scene (inspired by a local Santa Fe motel by the same name), which were penned while in Santa Fe.
