Details: The Rising Rebel album is for all my peoples who wanted more than just a taste of that GOLDENCHILD flavor heard on my previous works and audio clips from myspace.com. Think of it as the prelude to my major label distributed project called "ESCAPE" due out next year. While in the midst of recording "ESCAPE", I ran into a few talented musicians @ a rooftop party in Brooklyn (this summer) called GROW. While @ Grow, I was introduced to the band aptly titled THE GROW BAND. However, what I didnt know was that they were uncomfortably working for a management company that never paid or gave them any recognition for there efforts. Thus after a few performances, we decided to form a roots reggae hip hop soul movement called "PLAN B". Once the band formed, I decided to add live instrumentation to my self produced works and began to record material for the collective. After many months of performing all over the country with PLAN B, I realized that I was doing a disservice all my friends and fans that were awaiting a full length GOLDENCHILD project. Thus, here is some melodic mind food for you all to savor while I put the finishing touches on the "ESCAPE" release.. Ladies Gentleman, I present to you "REBEL RISING".. Hope you enjoy and I look forward to performing a venue near you all soon.. Blessings, GOLDENCHILD
