A fusion of electric guitar melodies and power with jungle beats, acid jazz grooves, sounds fx and soundscapes. 14 MP3 Songs ROCK: Instrumental Rock, JAZZ: Acid Jazz Details: 'Enter' is a multimedia album (for PC) with audio instrumental tracks fusing together the power and performance of a very talented and spirited electric guitar player, with an acid jazz meets jungle modern groove! Reviewers have already said that "...this album is ahead of its time." Laurie and Phil met while playing in a futuristic sounding rock band called the Strolling Bones. Although coming from different musical backgrounds they shared a common vision, to record music which combined the power of the electric guitar with modern grooves and soundscapes. Laurie is a talented guitarist who combines influences including Randy California (Spirit), Joe Satriani, Terje Rydal (chamber jazz rock!), Jan Akerman (Focus) and Jimi Hendrix. His compositions are complex in arrangement and often very tricky to play, yet remain very musical and memorable. Phil is a keyboard player keen on composition (especially harmonies), with influences from Queen, Genesis, and Jamiroquai. With his own recording studio he is able to spend a lot of time developing many ideas. Both musicians enjoy acid jazz, rock and classical music and elements of these have been carried across to the album. The 'Enter' project is an instrumental album, and the result of 3 years work (on and off). The album contains a diverse range of music genres, so there should be something for everyone! Finally it is multimedia with a section for PC users to enjoy video footage, imagery, and further details on the recording techniques and equipment used. We hope that you take the time to listen to some samples and check out our website for more information.
