

## Mp3 Mike Fageros - Mars In October

[DOWNLOAD HERE](#)

A jazz style between soul-jazz/R&B, bebop and fusion that never loses sight of the groove. 8 MP3 Songs

JAZZ: Jazz Fusion, JAZZ: Bebop Details: Texas guitarist Mike Fageros is a relative unknown in the larger spectrum of the "music business". Although he has been playing guitar for years, he has consistently refused to "sell out" to the whims of others, playing watered down so called "smooth jazz" and other forms for the sake of commercialism and marketing for the masses. He studied with the late Roy Buchannan when only 15 years old, majored in music theory and composition at Mc Lennan Community College and Baylor University once backing up the legendary vibrophonist Gary Burton also winning a scholarship for performance on guitar in the jazz ensemble. He toured with the late jazz great, trumpeter Luis Gasca ((Little Giant/Fantasy Records)) in the mid 70's, and has played with the reknown producer/drummer David Prater/Dream Theatre. This CD will be his second release and more effort has been put into this creation than any previous project. His teaming up with the "Young Lion", Houston drummer Jovol Bell has given his career new direction. That and with the addition of sidemen DeLover Axel and Kato Mc Kay (Al McKay's son) utilizes the guitar trio to its utmost. With few overdubs, and many live cuts, the real music comes through, similar to many of the Blue Note Albums in the 60's. The result is self evident in the final product, jazz guitar playing at its best.
