TB created alternate editions of select tracks from the debut Runaway release. These are blended electronically combining influences in club, house, and other pop infused electronica - purely for your listening pleasure. 11 MP3 Songs POP: with Electronic Production, ELECTRONIC: Dance Details: Original Release: Mar 2002 "Special Edition" Release: Dec 2003 Maybe I just have too much time on my hands, but the more I listen to a "finished" version of a song, the more ideas I get in my head as to where else it can go! Runaway Revisited is exactly that. I took a good chunk of the songs from the Runaway album and took them where inspiration would have them go. It's really a very similar to how I approach writing a song from scratch. But, Revisited is a decidedly more electronic, techno, dance edition of those songs. More edge, or more soft, more rhythm, or no rhythm at all. Groove or just ambience. :) So, have a listen and let me know what you think! And then go tell all your friends! Ha! Thanks for stopping by.
