Instrumental Rock/Ambient mood music with a Bluesy guitar weaving around grooves. 6 MP3 Songs  
NEW AGE: Environmental, ROCK: Instrumental Rock Details: Malc Battersby is a guitarist who has played many styles over a period of time and now puts them together in his own way for his own sound. This wandering Englishman is now an Australian and living in Tasmania. He has spent time in darkest Borneo on studio based work for a rich bloke, but was not really allowed to truly express himself, still it was a great experience. Before that BAT was in Japan with his own band doin' backing work for Japanese artists. In London he was working with many top artists but never in the foreground so after a number of years he decided to begin travelling to get a perspective. All I want to do is to give people some music which can lighten their moods with sounds that provide a welcome distraction to the everyday drag/ pressure stuff. MUSIC FOR YOUR IMAGINATION. So kick back, do your own thing and listen. This collection of music is 46 mins. long and I would just like to thank Cam for a great job on the drums. Malc Battersby. PS. LOOK OUT FOR 'Deeper Shades' AT THE END OF FEBRUARY
