Dissemination of Information for the Mind Songs Details: Controversial, that I'am Usually speaking on things people do not like to discuss openly, but I will and tell the truth behind it ALL. I put what I say into a musical forum and with a beat or music. I like to promote thinking and awaken the consciousness within individuals. Some of the typics I speak on are history, politics, everyday living ( facts ) love and of course religion. I'm not afraid to say what people generally think about and it do-not matter if its political correct, the truth is the truth. Some say I'm a little hard but what the hell, life is hard. Life is not sweet nor is the circumstances of this life as some live in hunger, homeless and pain. So many times we ALL have been the fool in one way or another like the WAR of freedom for another country when our freedom are slowly being taken away. Soon we all will live in concentration camps if the people of America don't wake up ! " That is the order of the New World Order "
