Reggae Music like you never heard before, great songs, great performances, you won't stop playing this Album, that's a promise. 10 MP3 Songs WORLD: Reggae, ROCK: Roots Rock Details: Ed is one of the most genuine and warm hearted people I have known, always going out of his way to help others in their musical careers at the expense of his own. A brilliant songwriter and record producer who owns a recording studio in London England. His love for good music and his passion for keeping it alive has been his lifes work. Here is a man who is true to the art form and works hard at it, purely for the love of it. (I mean this) He has helped countless artists to develop their carreers encouraging some to become writers and others to become great performers. All this without wanting anything in return, he has worked with some of the world's greatest artists, but such a humble and gentle soul will never ever be a name dropper. Talents like his are rear and hard to find, I happened to walk into his studio while he was "messaging around", as he calls it, putting a vocal on one of his songs 'Heaven Bless Them All' I was speechless, I said to him what are you doing with this song, he said, oh it's only a demo. I said you can't just keep that to yourself, people need to hear this, his answer was everything in God's good time. Well I know today is God's good time for Eddie and I strongly recomend that you listen to his album and support and encourage him as he continues to quietly work behind the scenes helping others to become great at music in whatever genre they may choose. God Bless You Ed.... Maizie Williams, Founder Member and Singer with Boneny M.
