From: insert author name Dear Budding Netpreneur, Just what exactly is a netpreneur? Are you - Sick of working nine to five? Laid off? Bored

with your current career path? Tired of commuting to work? A swamped student who needs more time to study? A desperate single mother? Saddled with a large debt? Daunted by large medical bills? Disabled? In need money for your own or your kid's education? Trying to recover from stock market crashes? Wanting to spend more time with loved ones? Sick of being tricked by money making scams? Want to start living the life that you always dreamed of - STARTING RIGHT NOW? Then you just clicked on the right web page. I have sifted through all the information that is out there on the web about starting your own internet marketing business, and have distilled it all down to one, perfectly clear critical path that you can follow - so that you can be up and running with your own internet business in less than one month. Consider the convenience of doing this, rather than opening some kind of business like a store! It could take you several months of planning to accomplish that! Being a entrepreneur is much easier. You can be up and running and making money in just a few days. I didn't just stumble across this information. Consider my story. My career was thriving in the nineties. I had built up a nice monthly salary and was financially secure for many years. Like many people, I never saw this most recent crisis coming I never thought that one day I would go from being gainfully employed at a respectable computer company to being an unemployed person with dwindling savings - thanks to the terrible things going on in the economy. One day, my secure little universe fell apart! I was laid off and everything was over! Then the economic forecasters got on television and started talking about the bad news. Then the bad news became a reality as the recession hit my personal savings and I lost thousands of dollars. Before long I found myself high and dry with no choices, bills piling up, and a hungry family to support. Several months passed and then I got that letter - the letter from the bank. If you do not pay your mortgage, we are going to foreclose on your house. I found myself looking for a job, but I wasn't having much luck. The jobs that I was qualified for were just not as common as they were over a decade ago. Not that I was not working at all! I found myself working at a retail job that was way beneath by qualifications, and before I knew it I was working two terrible jobs - and still not making enough to take care of the basics. I needed to do something fast, and I needed whatever I was going to do to bring me enough money to save my house - within thirty days! That is when I decided to start my own internet business to try and save the day. Let's face it - when the chips are down, you don't have time to waste. I spent every single second of my time researching the most expedient ways to create an online business and have it up and running and lucrative within 1 month. That is exactly how my eBook One Month to Your Own Online Business came to

be - it was the brainchild of desperation and necessity. In fact, this is exactly why I consider it to be a great book. The concepts in it are the product of great duress. I simply could not afford to put anything into action that possibly could fail, because to do so would mean I would fail myself, I would fail my family and I would lose my house! In my ebook you will learn - How to understand the different types of internet business and quickly decide which one is for you. How to immediately begin an internet marketing business that is recession proof and thrives. How to start a business immediately without having to put any money down for advertizing. How to find a product or service that people want or need, so that your business transcends dire economic predictions about bankruptcy How to build a website to promote your business, without spending way too much money You will also benefit from following the user friendly step by step guidelines in this book that are based on one simple business model. If you follow this business model that was developed by me you will start earning money very quickly! The business model that I have invented is self-sustaining, and improves with effort. The more marketing effort you invest in this one business model the better off you will be. Even better, the business model that I have invented for you is absolutely fool proof. You can build a business empire using it that can viably and realistically ring in thousands of dollars a month using very little start up capital. However, I don't recommend running your website forever on next to no capital! It is going to need to expand and grow. I made sure that the business model that I chose to develop was scalable. Yet another quality of my website model is that it is completely self-sufficient. You do not have to monitor and babysit it day and night. It runs itself on autopilot. Are you ready to get practical? Are you ready to take your financial and career problems in hand and do something about it?
