Darby Darl's musical journey began (of all places) on an Ohio pig farm. As a boy, he bought his first flat-top guitar with money he earned raising four runt piglets given up for dead. Through the static of his bedroom transistor radio, Darby taught himself to play many popular songs of the late 60's and early 70's. These hits became a major influence in his musical development and still echo in the sounds of his latest CD "Ghosts Angels." Along the way, Darby paid some dues. After relocating to Texas as a teenager, he formed his share of rock-n-roll road bands and even joined pretty-boy band RAM. Touring brought him in touch with some prominent acts in the business, including Stevie Ray Vaughn, Cheap Trick, Kiss, Todd Rundgren, Van Halen and Mitch Ryder. He later named one of his bands "The Wolfkings" because John Phillips of the Mamas Papas suggested it. Through it all, Darby took notes on the personal and professional dramas that would someday be expressed in his own songs. Darby knew when it was time to create "Ghosts Angels." An emotional divorce, the loss of his mother, and other personal issues inspired a therapeutic binge of songwriting. The catharsis that came from recording these songs was so draining that he put off the album's release for several years. Eventually, last February, he was ready to share his soul with those willing to lend an ear. His honesty, vulnerability and sincerity make this more than just an album ... it's a melodic peek into one man's secret

diary.
