Swashbuckling rock and roll that dances in the boweries and back alleys lit only by the washed out guitars, rollicking rhythms and all too real lyrics that come together for an epic alternative album. 11 MP3 Songs ROCK: Grunge, ROCK: Psychedelic Details: Dr.Pepper Family is real The dr.pepper family was founded in 1996. Core members Sebastian(guitar) and Jochen(drums) kind of grew up together. They were 16 years old when they recorded their first demo. Word spread quickly while about the same time Rudi(performer) and Jurgen(bass) were engaged in some speedblues project imitating all time (anti-) heroes MC5, Stooges and Velvet. A first probe rehearsal immediately produced dynamite, followed by energetic concerts at local festivals. On one of such occasions the band got noticed by the Kinky Star Label which suggested to record a first EP : The Nuthouse Tape, which contains four songs. (actually 5, keep looking) Rudi quit the family in 1999 at the time the dr.pepper family decided to 'go for it'. Concerts in Berlin, France and a short Swiss Tour followed. The Kinky Star Label noticed the progress that was made and gave the green light for a first full-CD. Metal Molly-whizkid Allen Muller helped out to get the compositions and harmonies right and at the end of 2001 the dr.pepper family started definite recordings with producer 4T4. The result of it is to be found on the full-album 'Taco and Red Beans'.
