"Now you can get free, highly targeted search engine traffic without worrying about Pandas or Penguins! Do YOU Want to Rank YOUR Videos on Page #1 of Google..... In Just a Matter of Hours?" There are some people who can consistently rank their videos on page 1 of Google as well as on the first page within YouTube for their chosen keywords. For many, however, it remains a mystery. They try and time again they always seem to get their videos buried down the rankings in no mans land. One of the main elements of ranking a You Tube video is the optimization done in the settings you know, the title,

description, and tags. You need this important text to do two things: Optimize your video for a high ranking for your keyword Make people want to click on your link to find out more! This can be tricky and time consuming especially if you have little experience of VSEO and writing good copy. This easy to use software does all of the heavy lifting for you. You just answer questions about your video by typing or pasting the information into each box. Then hit finish. Its as easy as that. You get perfectly optimized titles, description and tags for you to simply copy and paste into the settings as your video is being uploaded. You get perfect results every time. It takes less than 5 minutes from beginning to end!
