

# Histamine In Inflammation

[DOWNLOAD HERE](#)

1. One Hundred Years of Histamine Research Katherine Figueroa and Nigel Shankley  
Abstract Introduction Exploring the Physiological Effects of Histamine The First Antihistamines Pharmacological Definition of Histamine H1 and H2 Receptors Pharmacological Definition of the Histamine H3 Receptor Pharmacological Definition of the Histamine H4 Receptor The Molecular Biological Characterization of Histamine Receptors Alternative Intracellular Signaling of Histamine Receptors Generations of Histamine Targeted Genetically Modified Mice Conclusion
2. Molecular Pharmacology of the Four Histamine Receptors Gerold Bongers, Iwan de Esch and Rob Leurs  
Abstract The Discovery of the Four Histamine Receptors: An Historical Overview Histamine Receptors, Signal Transduction and Their Ligands The Histamine H1 Receptor and Its Ligands The Histamine H2 Receptor and Its Ligands The Histamine H3 Receptor and Its Ligands The Histamine H4 Receptor and Its Ligands Conclusion
3. Histamine Synthesis and Lessons Learned from Histidine Decarboxylase Deficient Mice Hiroshi Ohtsu  
Abstract Introduction HDC Transcriptional Regulation Epigenetic Regulation of HDC Gene Expression I Histidine Decarboxylase Gene Knockout Mice Histamine and Immunity Histamine in Wound Healing Histamine in Malaria Histamine in Crohn's Disease Histamine in Allergic Bronchial Asthma Histamine in Systemic Anaphylaxis Model Histamine in Atherosclerosis Histamine Uptake into and Release from Histamine Producing Cells Conclusion
4. Histamine in Allergic Rhinitis Thomas Taylor Clark  
Abstract Introduction Histamine and the Early Phase Response in Allergic Rhinitis H1 Receptors: Sensory Nerve Activation and Central Reflexes H1 Receptors and the Nasal Vasculature Other Histamine Receptors in the Early Phase Response Histamine Receptors and Immune Modulation Conclusion
5. The Role of Histamine in Ocular Allergy Masaharu Ohbayashi, Bita Manzouri, Kei Morohoshi, Ken Fukuda and Santa J. Ono  
Abstract Introduction Clinical Manifestations of Ocular Allergy Current Treatments for Ocular Allergy Allergic Responses in the Conjunctiva Mast Cells in the Conjunctiva Histamine in the Conjunctiva Histamine and the Conjunctival Barrier Histamine Receptors in the Conjunctiva Tissue Specific Roles of Histamine Receptors Conclusion
6. The Role of Histamine in Asthma Paul J. Dunford and Stephen T. Holgate  
Abstract Introduction Histamine in the Asthmatic

Airway Physiologic Role for Histamine in Lung and Asthma Immunological Modulation by  
Histamine Histamine in Animal Models of Asthma Antihistamines and Clinical Asthma Conclusion 7.  
Antihistamines in the Treatment of Urticaria Torsten Zuberbier and Marcus  
Maurer Abstract Introduction Management of Urticaria Follows Basic Principles Conclusion 8. Histamine and  
Antihistamines in Atopic Dermatitis Jrg Buddenkotte, Marcus Maurer, and Martin  
Steinhoff Abstract Histamine Histamine Receptors Histamine in Atopic Dermatitis Antihistamines and  
Histamine Receptor Antagonism in Atopic Dermatitis Clinical Studies of Antihistamines in Atopic  
Dermatitis Conclusion 9. Histamine, Immune Cells and Autoimmunity Elke Schneider, Maria Leite de Moraes  
and Michel Dy Abstract Introduction Histamine and Immune Cells Histamine and  
Autoimmunity Conclusion 10. Histamine in Neurotransmission and Brain Diseases Saara Nuutinen and  
Pertti Panula Abstract Histaminergic Neurons Histamine Synthesis, Storage, Release and  
Catabolism Histamine Receptors in the Brain Conclusion 11. Histamine in Normal and Malignant Cell  
Proliferation Andras Falus, Zoltan Ps and Zsuzsanna Darvas Abstract Histamine and Cell  
Proliferation Histamine in Normal Cell Proliferation Tumor Formation Principles Histamine in Benign and  
Malignant Tumors Human Tumors Histamine Blood Levels in Cancer Patients Effect of Histamine on  
Immune Regulation Conclusion 12. The Future Antihistamines: Histamine H3 and H4 Receptor  
Ligands Fuqu Yu, Pascal Bonaventure and Robin L. Thurmond Abstract Introduction Potential Indications  
for H3R Ligands Potential Indications for H4R Ligands Conclusion Index EAN/ISBN : 9781441980564  
Publisher(s): Springer, Berlin, Landes Bioscience Discussed keywords: Entzündung, Histamin Format:  
ePub/PDF Author(s): Thurmond, Robin L.
