There may be a universe where Dr. Maybe is the star of a science fiction movie, written and directed by himself. But in our universe, only the soundtrack remains.... No corporeal emanation of the Doctor has revealed itself in our world. But from a dimension outside the bounds of our reality, Dr. Maybe brings us his music, that most ethereal of art forms, channeled through the earth-bound talents of Beirut-born guitarist and composer John Prusinski. Kokoro Ire is the new album from Dr. Maybe. The music is an eclectic blend of world music, electronica, and electric guitar. It is a soundtrack for a movie from another dimension, set in a future where the descendants of Earth populate desert worlds, and massive starships, like overcrowded Eastern bazaars, teem with intrigue, magic, and strange beauty.
