A fusion of electronic and live rock to present a strange and jumping world to the listener. 10 MP3 Songs

ELECTRONIC: Industrial, METAL/PUNK: Heavy Metal Show all album songs: Psychokiller Songs Details:

Another step on the evolutionary ladder of Drums and Machines, the Psycho Killer Project is an experiment in live instruments and programming to create a rich tapestry of sound. Rod Marquart brings years of experience as a drummer, mixer, and programmer from a lengthy discography as Drums and Machines, the much celebrated and visionary project that has eaten up college charts for the last ten years or so. Rod is joined by a borderline sociopath by the name of Stefan Schiebel, famous for his work in Highwater, Asuras, Sour Cream, the Cure for Pain, and Maxx Power, hammering out vocals and trumpet licks with a vengeful slur. The sloth of the guitar work is the product of Pierre Porter, a veteran and prodigal musician on Halifax's amazing music scene. Additional guitars have been re/deconstructed by Madd Dog Matt Secord. We truly hope you will enjoy the hell we will put you through.
