Vocal toning for meditation and healing. 10 MP3 Songs NEW AGE: Meditation, NEW AGE: Healing
Details: The Lotus and the Rose project was a most exciting and creative process for me. I chanted and meditated and came to the studio with a clear mind and an open heart. What you hear is a result of allowing tones to just come through my voice. My wish is for all beings who listen to be blessed with peace, joy, and fearlessness. This CD was channeled specifically to be used for healing and meditation. It heals on a conscious and subconscious level, the tones penetrating and aligning your physical, emotional, mental, and spiritual spheres. [Several parents of children with ADHD have reported amazing successes at bedtime playing this CD]. The Lotus And The Rose is for the purpose of allowing you to ride the healing resonate tones to the center of your being. Surrendering blocks and aligning chakras one by one as the tonal development carries you across the bridge to a realm of peace, balancing your Yin and Yang. The following is an excerpt from the liner notes from Dave Weber. This CD could not have happened without him: "When Janiece approached me about this project I knew instinctively that it would be something extraordinary....I have known Janiece for many years and have worked with her closely on many projects. I have always loved her voice. She has a clear, pure, fluid tone that carries the unmistakable depth of her experience and passion for life. It is more than meditation music, it is the unfettered outflowing from the heart of a truly wonderful person, a singer, a healer, a great friend. This is the blossom that grew from a tiny seed. I feel fortunate to have been a part of it."
