my style is a creation of all music from the last 3 decades. 12 MP3 Songs EASY LISTENING: Soft Rock, ROCK: Hard Rock Details: I was born and raised in Boston Massachusetts back in the sixties. For as long as i remember I've been listening to the radio and I thought, "I want to do what those people are doing." So one day one of my friends who was a very accomplished guitar player offered to teach me what he knew. I jumped at the chance and he started teaching me. Another interesting thing was he played a right handed guitar left handed; lucky for me i was left handed too. But other people said we were playing upside down that was funny. Soon after that my friends and I started a band. We played clubs, schools,and skating arena's. It was great fun and we enjoyed doing it. But soon after the band broke up but I kept on going myself writing songs,singing and learning to play other musical instruments. Soon I had the song Mountain Dream featured on the Boston anthology series vol #11 produced by Joe Viglione, a local publisher, and now TV talk host. That was a starting point for me because for years I sent songs to record companies with little or no results. They would send me letters saying that was great someday your time will come. Well it never did! But I kept on going forward now I just completed this mountain dream CD which is a blend of new age rock and easy listening music. This is for the people I hope everyone out there reading this will enjoy listening to this CD many thanks and god bless! Peter Tee
