Growing through a life of self destruction, Apacolips has experienced true resurrection. Evolving from a mental and spiritual death, that which has come forth through this recent release will definitely define a clear picture of life after death. "Apacolips (Face Yo-Self) is a project that allowed me to look within myself and pull out some of my experiences, some of what I've been taught and some of what I've seen and address them with a two-edged sword. This album points out the good and evil, truth and falsehood, human and divine, with the objective of causing those who partake in it to face yo-self and overcome all obstacles in our path. This project is also my mission statement, which is to force the minds of humanity out of the grip of satanic forces through the power and gift of music." So, face yo-self, embrace yo-self and enjoy.
