

14000 Drinks And How To Make Them

[DOWNLOAD HERE](#)

FEATURES: ===== Searches: BarBack has the ability to search based on name, ingredient, recipe, category, and glassware. Views: BarBack can organize the drink list into six different views: Name, Liquor, Glassware, Category, Marked, and Liquor Cabinet. Drink Marking: You can mark drinks that you like or that interest you and come back to them later. There is a view that shows only marked drinks and there is a print feature that only prints the marked drinks. Printing: BarBack includes (in the registered version only) the ability to print on index cards with one drink per page. This allows you to make a handy card file of popular drinks to keep near your bar. Liquor Cabinet: You let barback know what ingredients you have and it will tell you what drinks you can make. Can include inexact matches. Shopping List: You select the drinks you want and BarBack will create a shopping list of ingredients and amounts for you. Ingredient Highlighting: Every recipes now highlights any ingredients that you are missing in a different color. You can change the color or turn this feature off if you want. Ingredient Cost: You can enter in the cost of ingredients and BarBack will use this information to calculate the cost of each drink. Drink Price: You can set prices for each drink based on a markup from the cost or based on a markup (or down) from the current price. You can even specify rounding and a minimum price.
