[DOWNLOAD HERE](#)

I am an essential pop songwriter; my own style comes from the influences I had as a Beatles and U2 fan; my songs try to mix a Brit pop sound with an Italian melodic tradition. 7 MP3 Songs POP: Pop, POP: Italian Pop Details: I am an Italian songwriter that tries everyday to put his own life and experiences on music. I am writer, singer, performer and arranger of mostly of the songs you're going to hear. I hope you're going to understand and catch the inner sense of the album; since I was young I always had to choose between two opposite ways, two possibilities; I've always been asked to be rational or instinctive, to follow my ambition or an easier way, to be what I wanted to be or what the others wanted me to be. That's life, that's my life. There's no need to choose a language to express, you can use Italian, English or even Turkish. We're all in need to show what we are and what we believe in. I'm trying to do the best I can in my country to reach success, but Italian music is not having a good time. Music industry is in great loss and none has money enough to give a possibility to young valid artists. Thank you for your attention in people I trust Fausto Ferrari People who are interested in U2 The Beatles The Police should consider this download. Tags: pop
