

# Mp3 Jackalope - Where The Jackalope Roam

[DOWNLOAD HERE](#)

Melodic, 60's influenced pop with Beatle-esque arrangements and a bit of folk rock on the side. 13 MP3 Songs POP: Beatles-pop, POP: 60's Pop Details: The Beatles meet James Taylor on their way to see a Broadway show. (Theres probably some way to work a guy with a duck on his head into that and make a joke but for now its just a glib description of the Jackalope sound.) And who are the people who create this wondrous sound you may ask? Even if you dont ask the answer is Scott Freiheit (Bass, Keyboards Vocals) a musical theatre composer and former Beatle copy-band musician and Jeff Viar (Guitar Vocals) a James Taylor fanatic who could easily be in a James Taylor copy-band if such a thing existed. Theres a long and complicated story involving drummers (see jackalopeonlinefor more information on that) and a guest saxophone player, Chris Woodcock, who pops in from time to time but basically thats about it. Jackalope is dedicated to the idea that music should be funsometimes even funny. But lest you think this is a comedy act behold the poignant ballads (like Serenade or Cant We Go Back?) or the moodily evocative Under the Sun! Of course you could just buy the record and behold all of the songs and decide for yourself whether or not you think theyre moodily evocative or poignant or fun. In fact thats a really good idea. Maybe you could come up with some better adjectives (hopefully positive ones) that would describe the music more accurately. It would certainly be something to do on a rainy day (especially if youre like us and you hate the rain). So dawdle no further and spend, spend, spend so that we can continue to create, create, create! Its good for the economyits good for the soulits good for YOU! Jackalope can also be found on the web at: [myspace.com/jackalopeonline](http://myspace.com/jackalopeonline)
