My parents at the time had bought me a baby drum set which i played every single day at 6am driving my parents crazy. Luckily they did not stop me from playing because they knew i had a gift. As the years went by I kept on learning how to play drums by watching others play and by listening to music. At 9 years old i was already playing drums at my church. Soon after, i started playing the piano at 11 years old at church, then at 12, I started playing the bass guitar. I also started my song writing at age 12. The first song i wrote had an impact to many people when i sang it, so i realized that what i had was not just a talent, but a gift from God. I really wasnt serious about singing until i was about 16. After singing numerous times at church and at other places, my singing was getting better and better. After writing a few more songs, i had a desire of producing my own cd album. At first, I didnt know how, I didnt know where to start, but luckily I had some people to show me the way. My cousin had given me some software to start my recording on my computer. So I started! As time time went by, I already had some songs finished on the recording, but unfortunately my computer had deleted my music numerous times, causing me to bring down my desire to finish my album... Music was still my passion, and I played in various places, with different bands, and singers. As time went by People who are interested in Luis Miguel Marcos Witt should consider this download.
