Details: SCHERYLL ANDERSON is a musician (electric and acoustic guitar), poet, and singer/songwriter, who grew up in a musically gifted family. Her mother was an opera singer and her father was a poet and lyricist. She has traveled throughout Europe and the United States as a fashion model, and is a familiar face on the runway and in print media. As a SAG/AFTRA actress, she has performed in television commercials and feature films. Scheryll's history in the music industry covers a wide range of experiences, from promoting the steel drum music of Trinidad Tobago, to working as an A&R Representative for King James Productions in Philadelphia. The experience that she acquired by working in the music business, has motivated her to form two businesses, Blazing Passion Publishing and Dream Quest Recording Studio. Continuing with the theme of "My Father's Love Songs" these additional songs are showcased in "My Heart And Me" all the selections on this CD are a tribute to his profound love. Scheryll's mother kept a large black trunk, which belonged to her father, in a bedroom of the house where she grew up. It was filled with papers that she later discovered was a treasure chest filled with his handwritten lyrics. In 1994, her mother handed his precious lyrics over to her, so that she could continue her father's dream of having his lyrics and melodies put to music. While typing her father's lyrics, she became inspired to write her own poetry and lyrics (prior to that, she had never written poetry or songs). At that time, she became motivated to study music and learned to play the guitar, in order to add musical arrangements to her father's lyrics, and to fulfill his lifelong passion of having his songs recorded by contemporary artists, and played on the radio

and in films. Her father was a prolific lyricist, and many of his poems and lyrics were dedicated to his beloved wife. The love and devotion that they shared is what inspires great romantic novels. Scheryll has taken up where her father has left off, so that everyone who listens to his music can experience the depth of his romantic core.
