Details: Untested Methods is produced, written and performed by one person: Strange1. Created as an idea for musical output in 1996, the project was nothing more than a hobby. Several thousand hours later the hobby becomes a lifestyle. While the creation of the music is inspired by cello suites, video game music, and progressive metal, about the only constant in Untested Methods is the fact that it's created digitally. The music isn't married to any one particular genre, though distorted drums and heavy synths do enjoy showing up every so often. Here the whims of industrial, drum'n'bass, electronica, classical, rock, and hip-hop eagerly dance together as anything else you would hear. This is the sound of Untested Methods.
