

Complex Dynamics

[DOWNLOAD HERE](#)

1 Introduction - 1.1 Why Complex Dynamics ? - 1.2 Preliminaries: Basics of Complex Numbers and Variables - 1.2.1 Complex Numbers and Vectors - 1.2.2 Complex Functions- 1.2.3 Unit Circle and Riemann Sphere - 1.3 Soft Introduction to Quantum Dynamics - 1.3.1 Complex Hilbert Space - 2 Nonlinear Dynamics in the Complex Plane - 2.1 Complex Continuous Dynamics - 2.1.1 Complex Nonlinear ODEs - 2.1.2 Numerical Integration of Complex ODEs - 2.1.3 Complex Hamiltonian Dynamics - 2.1.4 Dissipative Dynamics with Complex Hamiltonians - 2.1.5 Classical Trajectories for Complex Hamiltonians - 2.2 Complex Chaotic Dynamics: Discrete and Symbolic - 2.2.1 Basic Fractals and Biomorphs- 2.2.2 Mandelbrot Set - 2.2.3 Henon Maps - 2.2.4 Smale Horseshoes - 3 Complex Quantum Dynamics - 3.1 Non Relativistic Quantum Mechanics - 3.1.1 Dirac s Canonical Quantization - 3.1.2 Quantum States and Operators - 3.1.3 Quantum Pictures - 3.1.4 Spectrum of a Quantum Operator - 3.1.5 General Representation Model - 3.1.6 Direct Product Space - 3.1.7 State Space for n Quantum Particles - 3.2 Relativistic Quantum Mechanics and Electrodynamics - 3.2.1 Difficulties of the Relativistic Quantum Mechanics - 3.2.2 Particles of Half Odd Integral Spin- 3.2.3 Particles of Integral Spin - 3.2.4 Dirac s Electrodynamics Action Principle - 4 Complex Manifolds - 4.1 Smooth Manifolds - 4.1.1 Intuition and Definition of a Smooth Manifold - 4.1.2 (Co)Tangent Bundles of a Smooth Manifold - 4.1.3 Lie Derivatives, Lie Groups and Lie Algebras - 4.1.4 Riemannian, Finsler and Symplectic Manifolds - 4.1.5 Hamilton Poisson Geometry and Human Biodynamics - 4.2 Complex Manifolds - 4.2.1 Complex Metrics: Hermitian and Khler - 4.2.2 Dolbeault Cohomology and Hodge Numbers - 4.3 Basics of Khler Geometry - 4.3.1 The Khler Ricci Flow - 4.3.2 Khler Orbifolds - 4.3.3 Khler Ricci Flow on Khler Einstein Orbifolds - 4.3.4 Induced Evolution Equations - 4.4 Conformal Killing Riemannian Geometry- 4.4.1 Conformal Killing Vector Fields and Forms on M - 4.4.2 Conformal Killing Tensors and Laplacian Symmetry on M - 4.5 Stringy Manifolds - 4.5.1 Calabi Yau Manifolds - 4.5.2 Orbifolds - 4.5.3 Mirror Symmetry - 4.5.4 String Theory in Plain English - 5 Nonlinear Dynamics on Complex Manifolds - 5.1 Gauge Theories - 5.1.1 Classical Gauge Theory - 5.2 Monopoles- 5.2.1 Monopoles in R^3 - 5.2.2 Spectral Curve - 5.2.3 Twistor Theory of Monopoles - 5.2.4 Nahm Transform and Nahm Equations - 5.3 Hermitian Geometry and

Complex Relativity - 5.3.1 About Space Time Complexification - 5.3.2 Hermitian Geometry - 5.3.3
Invariant Action... EAN/ISBN : 9781402064128 Publisher(s): Springer Netherlands Format: ePub/PDF
Author(s): Ivancevic, Vladimir G. - Ivancevic, Tijana T.
