

Materiality Of Learning

[DOWNLOAD HERE](#)

Based on classroom ethnography, Sorensen investigates how different forms of learning arise when different learning materials are involved. The field of educational research lacks a methodology for the study of learning that does not begin with humans, their aims, and their interests. The Materiality of Learning seeks to overcome this human-centered mentality by developing a novel spatial approach to the materiality of learning. Drawing on science and technology studies (STS), Estrid SaE saE rensen compares an Internet-based 3D virtual environment project in a fourth-grade class with the class's work with traditional learning materials, including blackboards, textbooks, notebooks, pencils, and rulers. Taking into account pupils' and teachers' physical bodies, Professor SaE saE rensen analyzes the multiple forms of technology, knowledge, and presence that are enacted with the materials. Featuring detailed ethnographic descriptions and useful end-of-chapter summaries, this book is an important reference for professionals and graduate or postgraduate students interested in a variety of fields, including educational studies, educational psychology, social anthropology, and STS. EAN/ISBN : 9780511501470 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Sorensen, Estrid
