Details: Donna was born and raised in Cambridge, Ontario, Canada With an obvious early love of music she started piano lessons at the tender age of five years old. As she grew, Donna continued her music studies well into her teen years. Needing to have a break from these studies, but staying with her love of the piano, she started performing. She then worked on her performing skills in church services and at many social events and community functions. Eventually completing her music studies in her early 20s, Donna and those around her noticed that arranging was becoming her forte. Donna has accompanied and arranged for many vocalists and instrumentalists on various occasions. She also has vast experience with directing choirs and various vocal groups. Moving into the music industry, Donna taught music for over 25 years to many students. Other ventures in the industry led her to vocations including successfully owning and operating her own piano and organ store. Donna then got very involved in a management career and regrettably neglected her piano for 20 years. She has just recently revived her music career and is thrilled with being back at it again! Donna has lived in many Canadian provinces and in the state of Washington where she has set up a large network of music industry associates who are helping to get the word out about this new Christmas compilation. She hopes you will enjoy her music and the spirit of Christmas that she loves so much!
