12 of The greatest country music ever written. 12 MP3 Songs COUNTRY: Modern Country, COUNTRY: Bluegrass Details: dear friends. This is Andrew Jackson a.k.a. Billy Bob I have been asked to write a review about the, Gary's country, album. Let me say that I was a country DJ for many years, so they chose me to pick songs out of the Gary Matthews songbook. To choose 12 of the greatest country songs ever written. And I said I would. I first heard of Gary Matthews as a gospel song writer as a matter of fact I had ordered two of his albums Out Of Cd Baby. The Healer, album and his now famous, Lord you did it again' album these were the kind of inspirational songs you just couldn't buy or hear on the everyday gospel radio stations . however I had no idea that this man could write these kinds of country-western songs. Songs that are emotional. Songs about worlds in motion, pickem up trucks, and Paris Hilton? Songs about the Mona Lisa, an early-morning shadows to mention a few. Somehow he has found a way to reach into all of our souls, and extract something good out of every one of us. And then there's of course the hell raising evil nature of us all, where he writes about setin the woods on fire. The blanket on the ground and letting her hair hang down. And I found these songs in his songbook. And I was able get them assembled into the Gary's country, album on cd baby. So whether you are listening to the number one song on this album. Gary wrote a song, I find a particular joy in just listening to this story race through your mind. We were down in New Orleans search in for a dream when we found ourselves with nothin to do so Gary wrote a song, called the countryfied rock 'n roll blues. that's so knocked me out. I said OK I've got to have that number 1 on the album. Somehow, some way, somewhere this album takes the listener to places they have been before and could never forget .places of better times and better days. When it was fun to just have fun. Of Duty and honor, When we could laugh and runaway. When there really was, wine and roses. And romance on a hot Saturday night. And I love the way he wrote ' United we stand'

where he teams up with a very beautiful Jennifer, to stop a divorce. songs like this will very likely make Gary Matthews the essential American country icon. And then looking back there was a time when Gary was under pressure to come up with a song while in Nashville they were due to go in the next morning and they wanted one more last song for the session. So he sits down and writes a song about the islands. Lost love, a broken heart the gentle ocean breeze that's telling him to go. That song 'Garys Island' takes me away every time I hear it to some far-off dream world of palm trees beautiful days and nights of a tropical paradise. So if you're looking for something you can hear over and over just for the pure delight of hearing 12 of the greatest country songs ever written. Order now, three cheers, thumbs up. For the, Gary's country, album. And to a great country songwriter I give you my choice. Mr. Gary Matthews. may God bless you all. BillyBob. Special note, you can also order the album directly from Gary by simply writing to him at' b44g@comcast.net
