Related styles: POP: Quirky, ELECTRONIC: Electro People who are interested in Talking Heads Newsboys The B-52s should consider this download. Details: Born in Houston, TX in 1958. Reborn in the Lord in 1994. (That puts the artist at fourteen years of age as of this writing.) Graduated high school in 1977. Went to music school (School of Contemporary Musicnow defunct) in Boston, MA from 1977-78. Didn't finish. Moved back to Texas in 78. Joined family business (portrait photography) in 84. Had original band (that did NOT honor God) from 84 to 89. Got saved in 1994. (Best decision ever made by the artist.) Moved to Indianapolis, IN in 2004 and married Vicki (second best decision the artist ever made). Started job driving bulk mail contract for USPS. Called by God to start writing music again in December of 2007. First original song written in response to that call was Landing Gear. Have been pumping out about a song per month ever since. Most of the writing is done into a digital voice recorder while driving big rigs. Sequencing is done by artist whenever a free moment arises. Equipment consists of a PSR 550 Yamaha keyboard (used solely as a MIDI keyboard controller), an IMac with Garage Band software, and one mike with a pop screen. That's all.
