For fans of synthpop and electronic music. Debut album influenced by synthesizer artists such as Thomas Dolby, Gary Numan, Kraftwerk and Depeche Mode. Innovative mixture of pop/atmospheric/electronic music with a dash of sci-fi 14 MP3 Songs ELECTRONIC: Synthpop, ELECTRONIC: Techno Details: Following in the footsteps of synth/electronic music artists such as Kraftwerk, Thomas Dolby, Gary Numan, Depeche Mode, Ultravox, and Camouflage, this is the impressive debut release from Synth Groove. Synth Groove is actually Bob Salvati, who wrote, performed and produced the 14 songs on this CD-R, which clocks in at over 72 minutes. This is a true, 100 electronic music album done entirely with synthesizers, including many vintage analog synths which gives the album a warm and organic quality. Stylistically, the songs range from electronica to dance to pop. The album opens with the apocalyptic instrumental Face of the future and it only gets better from there. Larger than life has a larger than life catchy chorus and when the next track, Silent movie stars begins, you know youre listening to something very cool. One of the standout tracks, this song uses swirling synths and a haunting melody to create an atmospheric gem. Therapy is classic 80's synthpop and Roboter boy is done in true Kraftwerk-like fashion. This Radio action is a cranker and My Sister love is more synthpop. The nearly seven minute Do aliens dream in color, is reminiscent of Tangerine Dream at their most ambient. Despite its title, Very strange is a very catchy pop song. The strangest track, Thief in the night, is both menacing and melodic. When the drum beat kicks in on the Cybornauts, youll think youre hearing a sci-fi song that perhaps Thomas Dolby or an early Gary Numan might have done. Jupiter 19, with its synth hook and changing soundscapes is possibly the best of the four instrumentals. The synth bass pounding Watching the cars will instantly have you looking for the dance floor and for the albums closer, Electrical storms, Synth Groove may have saved the best song for last. If you like electronic/synth music,
