Fill In A Few Blanks, Push A Button And Out Pops A Fully Functional Wordpress Plugin That You Can Sell As Your Own. What you can do: - Sell plugins. Build a plugin and sell it. - Create a plugin and sell resell rights to it. The plugins this creates are yours (or your customers) and as such you can even sell resell rights to others. And the cool part is you can have a powered by link in the plugin which links back to you on every copy installed whether by someone you sold to or someone a reseller sold to! - Make a random clickbank link plugin for your own blog. - Sell plugins to your clients that they can give away to get backlinks to their sites.
