

Convective And Advective Heat Transfer In Geological Systems

[DOWNLOAD HERE](#)

1;Preamble;5 2;Acknowledgements;9 3;Contents;11 4;Nomenclature;15 4.1;Subscripts;16 4.2;Superscripts;16 5;Introduction;17 6;Distribution of Pore-Fluid Pressure Gradient in the Crust with Temperature Neglected;23 6.1;2.1 The Crust Comprised of a Single Homogeneous Layer;23 6.2;2.2 The Crust Comprised of Two Homogeneous Layers;26 6.3;2.3 The Crust Comprised of Three Homogeneous Layers;29 6.4;2.4 The Critical Crustal Thickness for a Hydrostatic Pore-Fluid Pressure Gradient;31 7;Pore-Fluid Pressure Gradients in the Crust with Heat Conduction and Advection;33 7.1;3.1 The Effect of Heat Conduction on the Distribution of Pore- Fluid Pressure Gradients;34 7.2;3.2 The Effect of Heat Conduction and Advection on the Distribution of Pore- Fluid Pressure Gradients;37 8;Convective Heat Transfer in a Homogeneous Crust;43 8.1;4.1 Convective Heat Transfer in a Homogeneous Crust without Upward Throughflow;44 8.2;4.2 Convective Heat Transfer in a Homogeneous Crust with Upward Throughflow;52 9;Convective Heat Transfer in a Heterogeneous Crust;65 9.1;5.1 The Influence of Layered Material Heterogeneity on Convective Heat Transfer in a Heterogeneous Crust;65 9.2;5.2 The Influence of Material Thermoelasticity on Convective Heat Transfer in a Heterogeneous Crust;75 9.3;5.3 The Influence of Pore-Fluid Viscosity on Convective Heat Transfer in a Heterogeneous Crust;87 10;Pore-Fluid Focusing within Two-Dimensional Faults and Cracks of Crustal Scales with No Temperature Effects: Solutions Expressed in a Local Coordinate System;99 10.1;6.1 Description of the Problem;100 10.2;6.2 Derivation of Governing Equations of the Problem in a Local Elliptical .. Coordinate System;102 10.3;6.3 Derivation of Analytical Solutions when the Long Axis of an Elliptical Inclusion Is Parallel to the Inflow in the Far Field;105 10.4;6.4 Derivation of Analytical Solutions when the Short Axis of an Elliptical Inclusion Is Parallel to the Inflow in the Far Field;109 10.5;6.5 Derivation of Analytical Solutions when the Inflow of the Far Field Is Parallel to the X Direction of the Global XY Coordinate System;112 10.6;6.6 Derivation of Analytical Solutions when the Inflow of the Far Field Is Parallel to the Y Direction of the Global XY Coordinate System;115 10.7;6.7 Application Examples of the Present Analytical Solutions for Pore- Fluid Focusing Factors within Inclined Elliptical Inclusions;117 11;Pore-Fluid

Focusing within Two-Dimensional Faults and Cracks of Crustal Scales with No Temperature Effects:
Solutions Expressed in a Global Coordinate System;125 11.1;7.1 Derivation of Inverse Mappings
between the Elliptical and the Cartesian Coordinate Systems;125 11.2;7.2 The Long Axis of an Elliptical
Inclusion Is Parallel to the Inflow in the Far Field;127 11.3;7.3 The Short Axis of an Elliptical Inclusion Is
Parallel to the Inflow in the Far Field;130 11.4;7.4 The Inflow of the Far Field Is Parallel to the X Direction
of the Global XY Coordinate System;133 11.5;7.5 The Inflow of the Far Field Is Parallel to the Y Direction
of the Global XY Coordinate System;135 11.6;7.6 Application Examples of the Present Analytical
Solutions;137 12;Pore-Fluid Flow Focused Transient Heat Transfer within and around Two- Dimensional
Faults and Cracks of Crustal Scales;149 12.1;8.1 Statement of the Problem;150 12.2;8.2 Validation of the
Numerical Models;152 12.3;8.3 Numerical Simulation Results;154 13;Convective Heat Transfer within
Three- Dimensional Vertical Faults Heated from Below;161 13.1;9.1 Statement of the Problem;162
13.2;9.2 Analysis of Convective Instability of the Fault Zone System;166 13.3;9.3 Possibility of Convective
Flow in Geological Fault Zone Systems;172 14;Convective Heat Transfer within Three- Dimensional
Inclined Faults Heated from Below;177 14.1;10.1 Governing Equations of the Problem;179 14.2;10.2
Analysis of Convective Instability of Pore-Fluid Flow in an Inclined Three- Dimensional Fault Zone
System;183 14.3;10.3 Effect of the Dip EAN/ISBN : 9783540795117 Publisher(s): Springer, Berlin
