

Mechanics Of Generalized Continua

[DOWNLOAD HERE](#)

1;Preface;5 2;Contents;9 3;List of Contributors;14 4;Part I Historical Background and Future Trends;19
4.1;1 A Historical Perspective of Generalized Continuum Mechanics;20 4.1.1;1.1 Introduction;20 4.1.2;1.2
From Cauchy and the 19th Century;21 4.1.3;1.3 True Generalizations;22 4.1.3.1;1.3.1 Various Reasons
of the Nonsymmetry of the Cauchy StressTensor;23 4.1.3.2;1.3.2 Loss of Validity of the Cauchy
Postulate;26 4.1.3.3;1.3.2.1 Gradient Theories;26 4.1.3.4;1.3.2.2 Strongly Nonlocal Theory (Spatial
Functionals);28 4.1.3.5;1.3.3 Loss of the Euclidean Nature of the Material Manifold;29 4.1.4;1.4
Conclusions;30 5;Part II Beams, Plates, and Shells;37 5.1;2 Micropolar Shells as Two-dimensional
Generalized Continua Models;38 5.1.1;2.1 Introduction;39 5.1.2;2.2 Basic Relations of Micropolar Shell
Theory;40 5.1.2.1;2.2.1 Kinematics of a Micropolar Shell;40 5.1.2.2;2.2.2 Principle of Virtual Work and
Boundary-value ProblemsStatements;42 5.1.2.3;2.2.3 On the Constitutive Equations of Micropolar
Shells;44 5.1.2.4;2.2.4 Compatibility Conditions;45 5.1.2.5;2.2.5 Variational Statements;46
5.1.2.5.1;2.2.5.1 Lagrange Principle;46 5.1.2.5.2;2.2.5.2 Hu-Washizu Principle;46 5.1.2.5.3;2.2.5.3
Hamilton-type Principle;47 5.1.2.6;2.2.6 Linear Theory of Micropolar Shells;48 5.1.2.7;2.2.7 Principle
Peculiarities of the Micropolar Shell Theory;50 5.1.3;2.3 Constitutive Restrictions for Micropolar Shells;51
5.1.3.1;2.3.1 Linear Theory of Micropolar Shells;52 5.1.3.2;2.3.2 Coleman-Noll Inequality for Elastic
Shells;52 5.1.3.3;2.3.3 Strong Ellipticity and Hadamard Inequality;55 5.1.3.4;2.3.4 Strong Ellipticity
Condition and Acceleration Waves;57 5.1.3.5;2.3.5 Ordinary Ellipticity;60 5.1.4;2.4 Phase Equilibrium
Conditions in Micropolar Shells;61 5.1.4.1;2.4.1 Thermodynamic Continuity Conditions;62 5.1.4.2;2.4.2
Kinetic Equation;66 5.1.5;2.5 Conclusions;67 5.1.6;References;67 5.2;3Structural Dynamics and
Generalized Continua;71 5.2.1;3.1 Introduction;71 5.2.2;3.2 Overview of Discrete Homogenization;72
5.2.3;3.3 Studied Structures;74 5.2.4;3.4 Transverse Vibrations;75 5.2.4.1;3.4.1 Natural Transverse
Vibrations: Translation Modes;75 5.2.4.2;3.4.2 An Example: Slender Timoshenko Beam;77 5.2.4.3;3.4.3
Atypical Transverse Vibrations: Gyration Modes;79 5.2.5;3.5 Longitudinal Vibrations;81 5.2.6;3.6
Extension and Application to Buildings;82 5.2.6.1;3.6.1 Generic Beam Model for Structures with Shear
Walls;84 5.2.6.2;3.6.2 Calculation of Macroscopic Parameters;85 5.2.7;3.7 Conclusion;89

5.2.8;References;89 5.3;4 A Bending-gradient Theory for ThickLaminated Plates Homogenization;91
5.3.1;4.1 Introduction;91 5.3.2;4.2 Notations;92 5.3.3;4.3 Revisiting the Reissner-Mindlin Plate Theory;93
5.3.3.1;4.3.1 The Three-dimensional Model;93 5.3.3.2;4.3.2 Reissner-Mindlin statically compatible
fields;94 5.3.3.3;4.3.3 Localization;95 5.3.3.4;4.3.4 Love-Kirchhoff Fields;95 5.3.3.5;4.3.5 Stress Field
Generated by a Linear Variation of the BendingMoment;96 5.3.3.6;4.3.6 Mechanical Meaning of the
Gradient of the Bending Moment;97 5.3.4;4.4 The Bending-gradient Plate Model;98 5.3.4.1;4.4.1
Summary of the Plate Model;98 5.3.4.2;4.4.2 Projection of the Bending-gradient Plate Model;100
5.3.5;4.5 Application to Laminates;101 5.3.5.1;4.5.1 Plate Configuration;101 5.3.5.2;4.5.2 Distance
Between the Reissner-Mindlin and theBending-gradient Model;101 5.3.5.3;4.5.3 Cylindrical Bending;101
5.3.5.4;4.5.4 Results;103 5.3.5.5;4.5.5 Discussion;107 5.3.6;4.6 Conclusion;107 5.3.7;References;108
6;Part III Advanced ConstitutiveModels;110 6.1;5 Internal Length Scale Effects on the Local andOverall
Behavior of Polycrystals;111 6.1.1;5.1 Introduction;112 6.1.2;5.2 Field Equations and
Thermodynamics;114 6.1.3;5.3 Resolution Methods;116 6.1.3.1;5.3.1 Fourier Transforms;116
6.1.3.2;5.3.2 Green Functions;118 6.1.4;5.4 Continuum Theory of Defects and Mean Field
Approaches;120 6.1.5;5.5 Modeling Intragranular Slip Bands as Super-di EAN/ISBN : 9783642192197
Publisher(s): Springer, Berlin Discussed keywords: Kontinuumsmechanik Format: ePub/PDF Author(s):
Altenbach, Holm - Maugin, Grard A. - Erofeev, Vladimir
