Medial Representations

[DOWNLOAD HERE](#)

1. Introduction- Stephen Pizer and Kaleem Siddiqi and Paul Yushkevich- 1.1 Object representations- 1.2 Medial representations of objects- 1.2.1 The Definition of the Medial Locus- 1.2.2 Structural Geometry of Medial Loci - 1.2.3 Local Geometry of Medial Loci- 1.2.4 Medial Atoms and M-Reps- 1.3 Psychophysical and Neurophysiological Evidence for Medial Loci- 1.4 Extracting Medial Loci of Objects- 1.4.1 Distance Transforms, the Hessian, Thinning and Pruning- 1.4.2 Skeletons via Shocks of Boundary Evolution- 1.4.3 Greyscale Skeletons- 1.4.4 Core Tracking- 1.4.5 Skeletons from Digital Distance Transforms- 1.4.6 Voronoi Skeletons- 1.4.7 Skeletonization by Deformable Medial Models- 1.5 Applications of medial loci in computer vision- Part I Mathematics- 2. Local Forms and Transitions of the Medial Axis- Peter J. Giblin and Benjamin B. Kimia- 2.1 Introduction- 2.2 Definitions- 2.3 Contact- 2.4 Local forms of the symmetry set and medial axis in 2D- 2.5 Local forms of the medial axis in 3D- 2.6 Local reconstruction from the symmetry set or medial axis in 2D- 2.7 Local reconstruction from the symmetry set or medial axis in 3D- 2.8 Symmetry sets and medial axes of families of curves- 2.9 Medial axes of families of surfaces- 2.10 Consistency conditions at branches- 2.11 Summary- 3.Geometry and Medial Structure- James Damon- 3.1 Introduction- 3.2 Medial Data on Skeletal Structures- 3.2.1 Blum Medial Axis and General Skeletal Structures- 3.2.2 Radial Flow Defined for a Skeletal Structure- 3.2.3 Radial and Edge Shape Operators for 1D and 2D Medial Structures- 3.2.4 Level Set Structure of a Region and Smoothness of the Boundary- 3.3 Local and Relative Geometry of the Boundary- 3.3.1 Intrinsic Differential Geometry of the Boundary- 3.3.2 Geometric Medial Map- 3.3.3 Deformations of Skeletal Structures and Boundary Smoothness and Geometry- 3.4 Global Geometry of a Region and its Boundary- 3.4.1 Skeletal and Medial Integrals- 3.4.2 Global Integrals as Skeletal and Medial Integrals- 3.4.3 Consequences for Global Geometry- 3.4.4 Expansion of Integrals in terms of Moment Integrals- 3.4.5 Divergence Theorem for Fluxes with Discontinuities across the Medial Axis- 3.4.6 Computing the Average Outward Flux for the Grassfire Flow- 3.5 Global Structure of the Medial Axis- 3.5.1 Graph Structure for Decomposition into Irreducible Medial Components- 3.5.2 Graph Structure of a Single Irreducible Medial Component- 3.5.3 Consequences for the Topology of the Medial Axis and Region- 3.6 Summary- Part II Algorithms- 4. Skeletons Via Shocks of

Boundary Evolution- Kaleem Siddiqi and Sylvain Bouix and Jayant Shah- 4.1 Overview- 4.2 Optics, Mechanics and Hamilton-Jacobi Skeletons- 4.2.1 Medial Loci and the Eikonal Equation- 4.2.2 Hamiltonian Derivation of the Eikonal Equation - 4.2.3 Divergence, Average Outward Flux and Object Angle- 4.3 Homotopy Preserving Medial Loci- 4.3.1 2D Simple Points- 4.3.2 3D Simple Points- 4.3.3 Average Outward Flux Ordered Thinning- 4.3.4 The Algorithm and its Complexity- 4.3.5 Labeling the Medial Set- 4.3.6 Examples- 4.4 An Object Angle Approach- 4.4.1 Examples- 4.5 Discussion and Conclusion- Discrete Skeletons from Distance Transforms in 2D and 3D... EAN/ISBN : 9781402086588 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Viergever, Max - Siddiqi, Kaleem - Pizer, Stephen M.
