It is virtually impossible to hear this disc without feeling a sense of renewal- adult contemporary instrumental music artfully combining elements of jazz, light rock, classical and new age. 14 MP3 Songs  
JAZZ: Smooth Jazz, EASY LISTENING: Mood Music Details: This is a collection of songs I wrote with the purpose of expressing an artistic vision, not for the purpose of necessarily selling music. I love many forms of music, and was looking for a way to combine them that would be fresh and original. I am pleased with the result, and sincerely hope you will be too. I have a Master's degree in Psychology and am also a published author, both in print and electronic forms. I especially enjoy music that challenges me in some way. Lately, I am very much into bands like Dream Theater, King's X, Porcupine Tree, and Spock's Beard. I also love the music of Steve Hackett, Allan Holdsworth, and Frank Zappa. When I'm not working, I really enjoy offbeat films and usually gravitate toward foreign and independent stuff. Thanks for taking the time to explore my world and my music. I appreciate the interest. Hope you decide to take a chance on my CD. I feel confident you won't regret it. \*\*\*\*\*
