

New Trends In Thin Structures: Formulation, Optimization And Coupled Problems

[DOWNLOAD HERE](#)

1;Title Page ;3 2;Copyright Page ;4 3;PREFACE ;5 4;Table of Contents ;7 5;A plate theory as a mean to compute precise 3D solution including edge effects and related issues ;8 5.1;1 Introduction ;8 5.2;2 The classical theory of Laminated Plated or CLT ;10 5.2.1;2.1 Description of the plate and of the constitutive relation ;10 5.2.2;2.2 Basic assumptions of the CLT ;12 5.2.3;2.3 The equations of the CLT in general forces ;13 5.2.4;2.4 Formulation of the plate problem ;15 5.3;3 Reconstruction of an approximation of the inner 3D solution from the plate solution ;16 5.3.1;3.1 Reconstruction of a quasi-admissible stress field ;16 5.3.2;3.2 Reconstruction of an associated approximation of the displacement field ;17 5.3.3;3.3 Example of an isotropic plate loaded only on its lateral surfaces ;18 5.3.4;3.4 Expression and properties of the plate for an isotropic plate loaded only on its lateral surfaces ;19 5.3.5;3.5 Iterative reconstruction of the 3D expression of the displacement and stresses: principle and notations ;19 5.4;4 Edge effects analysis ;23 5.4.1;4.1 Analysis of boundary conditions ;24 5.4.2;4.2 Edge effects computation ;25 5.4.3;4.3 Example with isotropic plate ;29 5.5;5 Conclusions ;32 5.6;Bibliography ;33 6;A Fully Nonlinear Thin Shell Model of Kirchhoff-Love Type ;36 6.1;1 Introduction ;36 6.2;2 Nonlinear Kirchhoff shell theory ;37 6.2.1;2.1 Kinematics ;37 6.2.2;2.2 Strains ;39 6.2.3;2.3 Stresses ;44 6.2.4;2.4 Power ;45 6.2.5;2.5 Weak form of the local equilibrium equation ;47 6.2.6;2.6 Statics ;49 6.2.7;2.7 Boundary conditions ;50 6.2.7.1;2.7.1 Free and unloaded edges ;54 6.2.7.2;2.7.2 Fixed but free to rotate edges ;54 6.2.7.3;2.7.2 Clamped edges ;54 6.2.8;2.8 Complete weak form of the equilibrium equations ;55 6.2.9;2.9 Tangent weak form of the equilibrium equations ;55 6.3;3 Elastic constitutive equations ;57 6.3.1;3.1 Plane stress condition ;57 6.3.2;3.2 General elastic isotropic material ;58 6.3.3;3.3 Neo-Hookean material ;59 6.3.4;3.4 Incompressible isotropic elastic material ;60 6.4;4 Conclusions ;61 6.5;Bibliography ;61 7;A Beam Finite Element for Nonlinear Analysis of Shape Memory Alloy Devices ;66 7.1;1 Introduction ;66 7.2;2 Geometrically exact beam theory ;69 7.2.1;2.1 Preliminaries: the rotation manifold ;69 7.2.2;2.2 Reissner's beam model: kinematics ;72 7.2.3;2.3 Reissner's beam model equilibrium ;74 7.3;3 Total lagrangian finite element scheme ;79 7.3.1;3.1 Consistent linearization ;81 7.3.2;3.2 Remarks on the

chosen finite element model ;82 7.4;4 Shape Memory Alloy Constitutive Model ;82 7.4.1;4.1 Time-discrete frame and solutions algorithm ;87 7.5;5 Cross section integration algorithm ;89 7.6;6 Numerical tests ;91 7.6.1;6.1 Calibration of the proposed scheme ;91 7.6.2;6.2 Cantilever beam ;93 7.6.3;6.3 Elbow beam ;94 7.6.4;6.4 Spring actuator ;94 7.7;7 Concluding remarks ;98 7.8;Bibliography ;99 8;A Unifield Approach for the Nonlinear Dynamics of Rods and Shells Using an Exact Conserving Integration Algorithm ;105 8.1;1 Introduction ;105 8.2;2 Parameterization of the rotation field ;106 8.3;3 Rod and Shell Dynamics ;108 8.3.1;3.1 Kinematics ;108 8.3.2;3.2 Strains ;110 8.3.3;3.3 Stresses ;111 8.3.4;3.4 External forces ;112 8.3.5;3.5 Linear and angular momentum ;113 8.3.6;3.6 Equations of motion ;113 8.3.7;3.7 Weak form of the equations of motion ;115 8.3.8;3.8 Internal and kinetic energy ;116 8.4;4 Time increment ;121 8.4.1;4.1 Incremental displacements and rotations ;122 8.4.2;4.2 Incremental strains and strain rates ;123 8.4.3;4.3 Increments of momentum, kinetic and strain energy ;124 8.5;5 Time integration Algorithm ;125 8.5.1;5.1 Time collocation of the equations of motion ;125 8.5.2;5.2 Time approximations and algorithmic weak form ;126 8.5.3;5.3 Conservation of linear and angular momentum ;127 8.5.4;5.4 Conservation of energy ;127 EAN/ISBN : 9783709102312 Publisher(s): Springer, Berlin, CISM Format: ePub/PDF Author(s): de Mattos Pimenta, Paolo - Wriggers, Peter
