

Twitter Traffic Swarm - Get More Free Targeted Traffic From

[DOWNLOAD HERE](#)

How I Get More Traffic From This Newly-Tapped (And FREE) Source Than Most Big Spenders Blow-Through In Their Paid Accounts! Best of all, this is targeted traffic, the kind that turns into S-A-L-E-S! Better get a piece of yours before this Wild West rail moves on for good Dear Fellow Online Marketer, A lot of folks will try to sell you on getting more followers with Twitter. More followers, they say, equals a bigger list. But does it really? See, I have a different approach. I don't care about the number of followers I have. I care about the targeted traffic I receive from Twitter. Targeted traffic = sales, and I have the stats to prove it. Sure, I could get Britney Spears' followers, but will they convert to customers? Put another way: A few hundred followers who are passionate about my niche are light years better than hundreds of thousands who could care less. I could probably get thousands of Britney Spears' followers to follow me, but what will that get me? Do you think they're going to want to network with me or visit my blog or buy my products and services? Probably not. This is a case where quality definitely trumps quantity. And where you choose to focus your efforts makes all the difference. Why Twitter? Well, it just happens to be a very effective way of generated pre-qualified free website traffic. If you do it correctly. For a long time, I hovered around the same number of followers. That's because I didn't do anything to change that. But right around the 2nd week of April I started experimenting and using these techniques (that I want to show you), and boy did they deliver! Some of them I figured out on my own that nobody

else is talking about and some I learned from others. But the end result is pretty clear. Now I don't claim to be a social media expert or Twitter guru. Mostly I just applied some tried and true direct response techniques, that I already know work, to Twitter and my blog. In fact... Getting Followers On Twitter Was The Easy Part! Converting them to sales wasn't as simple. But it's definitely doable. I want to show you what I did that got me free targeted traffic and more sales from these few tweaks that I made (it has nothing to do with "mass following" or anything like that). I put everything I did into a series of videos. They're full of meat, and they show you exactly how you can do the same thing I did to get results like this. But First, A Warning... If you're just looking to gain more followers on Twitter, you'll get that here, but you won't be pleased with the results. I'll wager you'll do a LOT better with the targeted traffic and SALES that these followers will bring you. But you need to know how to get the right people to follow you. And that's just part of what I want to show you. In fact, here are the video's I've created for you: Video 1: Your Twitter Account And Other Twitter Apps You Should Know About (And why you shouldn't follow another person until you see this video!) Video 2: The First Piece Of The Puzzle Entice Potential Followers & Turn Them Viral Video 3: How & What To Tweet To Get Maximum Followers And Targeted Traffic Video 4: How To Build Targeted Followers FAST - Part 1 Video 5: How To Build Targeted Followers FAST - Part 2 Video 6: Setting Up Your Landing Site For Maximum Leverage Video 7: Twitter Giveaways And Leveraging Their Follower Lists These videos show the EXACT steps I've done in the last 3 weeks to get massive targeted traffic to my blog, and more importantly, sales! In fact, look at my blog traffic analytics. Every time there was a spike in traffic and sales, it coincided with a promo or tweet I did on Twitter. There's no coincidence there. This stuff works, and it's not that hard to do. UPDATE: In the week following my "experiment," I noticed that my targeted followers continue to climb (leading to even more traffic and sales). What did I do? Absolutely NOTHING! Look at it this way: Twitter may be fairly new on the scene, but it's here to stay. With big companies like Zappos, JetBlue, Southwest, Comcast, Dell, MSNBC, Dunkin' Donuts, and countless others joining Twitter every day and building their own targeted followers, Twitter's not going anywhere any time soon. You Do NOT Want To Be The Entrepreneur Who Hasn't Seen These Ultra-Effective Twitter Secrets! See, it's the late adopters who are going to find themselves trying to play "catch-up." Don't let your business fall behind your competitors'. They're already exploring new and creative ways to integrate their businesses with Twitter. Doesn't it make sense to not only find out what all the fuss is about, but learn some of the cutting edge strategies being used with

Twitter while the platform is still in its infancy? That way your competitors are the ones struggling to catch up to you! Now these videos are by no means an A to Z reference of everything you can do with Twitter. Such a thing doesn't exist. New innovative solutions are being created out of thin air all the time. But when you do invest in this video package, I'll make sure I keep you abreast of all the neat useful tips, tricks, news, software, and strategies that I come across as they become available. That way you're investing now and for the future! In fact, I'm not going to beat around the bush trying to convince you the value of these videos. I'm going to GIVE you one of my best ones the foundation of viral followers right herein the hopes that you see what I'm getting at when I talk about turning one targeted follower into a viral stream of many. I hope you see the power of this potential. Even MLM can't match this for sheer numbers reached with their "pyramid" structure. After all, there's absolutely NO pyramid of any kind here! No, this is MUCH more powerful. There's plenty more that I want to show you. I will admit, however, that it will take an hour or two to set everything up, then 10 minutes or so each day, depending on how much you want to gain using these methods. But like you saw above, once you set things in motion, you'll continue to see results whether you're at your computer (or iPhone or whatever you use to access Twitter) or not.
