Sarah was born in 1975. It does not matter the place, her life made perpetual uprooting. Her origins? She speaks little about it: Just it is known that her mother comes from a noble family "Spanish" which migrated to North Africa. In the veins of her father runs Polish and English German blood! STOP! She will not say anymore. Her life is her own business, the way she lived! Alone or accompanied in the total destitution or in the opulence afforded in societies cast. Since very small, she found a deliverence in the art of dance. Her passion for the earth, this great unknown factor... nothing can stop her nor the mockeries, nor threats. She is dissociated from prejudgement and becomes the "travelling acrobat" of the family: that which dreams too extremely and which disturbs. To sink, go from front, to live or survive more than all.... Hardliner Sarah? Yes unquestionably! The lyrics which she writes disturb as much as the mosaic ones dedicated to life. Sarah speaks to us in her song. She makes up her thoughts of the color of other languages, English, Spanish, Hebrew, old Greek, old Aramen, Latin. It is so much easier to be delivered thusly. Pains, joys, loves, hopes all mixes and merges. The world of Sarah is for those who can hear it, in all this pallet... not to be sharp with, without offense, it is enough to listen to the intention a young woman to paint us the Life. Sarah practise a lot buhddism, yoga, meditation.....More than mystical:) oh yes!!!with not a single doubt
