Perhaps this is jazz music with many new age and pop elements. The emotional spectrum of it ranges from funny and bright to dark and severe, however, it is daring to call it jazz. Perhaps it's just a musical picture of three souls, thriving together... 9 MP3 Songs JAZZ: Weird Jazz, NEW AGE: Meditation Details: eloah-art is the musical project of elmar c. fuchs. It started 1993. Until now, 6 CDs have been recorded. The CD "ample jazz - mondstein 2" was created from many hours of jam-sessions of elmar c. fuchs, jrg horner and markus sworzik. the unique voice of horner, not as classical as heard in the lo-fi suite "mondstein", but more detailed, fine, combined with the jazzy drumplay of sworzik give the almost classical pianoplay of fuchs a new style. From pop to jazz, even a little bit of rock (thanks to peter jaklitsch on "adej"), the emotional spectrum of this almost eerie work ranges from funny and bright (diamond, haheia) to dark and weird (the night when the bear was murdered) whereas it also reveals total musical freedom (velvet sunrise).
